Light Stack Tower Installation Guide

Included Hardware:

- (1) Tower Light with audible alarm
- (1) Mounting bracket and hardware
  - (1) 3/8”-16 7/8” Long Screw
  - (1) Washer
  - (1) 3/8” Hex Head Locknut
- (1) GPIO wiring harness (reader-specific)

Recommended Tools:

- 9/16” Socket Drive and Box Wrench

Step 1:

Align the light stack tower bracket over the installation hole on the Industrial Portal. Fasten the bracket to the portal with the 3/8”-16 7/8” long screw, washer, and locknut

Step 2:

Install the light stack tower in the mounting bracket, and secure it with plastic keeper nut

Step 3:

Insert the grey cable connector on the GPIO wiring harness into the light stack tower. Hand-tighten to secure

Step 4:

Connect the GPIO cable to the RFID Reader
